The Death of Mildred Ann Jespersen.

It pleased the Lord to quickly call little Mildred Ann, 21 month old daughter of Mr and Mrs Harold Jespersen from her play to her heavenly home on Wed Oct 19. The funeral took place at Glory Hills Baptist church Friday, Oct. 21. Rev A Kraemer officiated. The pallbearers were Albert Goetz, Herbert Goetz, Ralph Jespersen, John Adam. Beautiful floral tributes were received from 'Daddy, Mamma, Norman and Tillie, Martha; Grandpa and Grandma Goetz and family; Grandpa and Grandma Jespersen and family; Roland, Frieda, Elmer; Remben and Margaret; Uncle Bert and Aunt Lottie; Uncle and Auntie Armstrong and family; Mr and Mrs

A Wolfe, George and Elizabeth, Mr and Mrs Jones, Amy and Jessie; Mr and Mrs Michael; Mr and Mrs Campbell; Max Stuart; Mr and Mrs John Staub and family; Mr and Mrs C Miller and family; Mr and Mrs C Hinkel & family. She awaits in glory her Mamma and Daddy and Brother Norman; also many relatives and friends.

A Card of Thanks.

We wish to extend our heartfelt thanks to all who so kindly assisted and for the words of sympathy and kind beautiful floral tributes during our recent bereavement. Mr and Mrs Harold Jespersen and Norman.

Chicago Institute of Diesel Engineering.

We are selecting a few mechanically inclined men to take a training in Diesel Engineering. Excellent opportunities for those who can qualify themselves to enter this fast-growing field. We will be pleased to forward information to those interested. Write stating age to Box 248, Calgary, Alta.

The Side Streets for Trucks.

At a recent meeting of Wetaskiwin City Council a motion carried that all trucks must keep off Main street for parking purposes, and do their parking on side streets. The city constable was instructed to see that the order was carried out.

Wetaskiwin has made a move in the right direction, which other cities and towns would do well to follow. There is one town we could mention where the parking of trucks on Main street is not only a nuisance but a menace to the travelling public. Several accidents have lately occurred which prove this.

In Stony Plain on the night of Oct. 17, when the street light at the P.O. corner was out, a truck was incorrectly parked near the intersection with all lights out, which was bumped into by a sedan traveling at a moderate speed. The damage was slight. But it goes to show what could have happened had the driver of the sedan been traveling at a speed which is now considered fashionable: 50 m.p.h.

In this connection, while trucks have been specifically mentioned as being relegated to the side streets, for parking purposes, these are not the only vehicles which are a menace to others—for instance, there is the automobile with its attendant trailer. One such was noticed on Main street Friday, Oct. 14. This car was parked along in front of block 3, and in addition to a 4-wheeled trailer, had about a dozen boards which protruded over the back of the trailer about 4 feet—and not a light on any part of the outfit. By actual measurement, the whole caravan took up exactly half of the roadway from curb to curb—less 9 inches.

The Highway Detour.

Work on the reconstructed Jasper Highway continues. Judging by appearances, the new road over the Kuhl farm and the "over pass" at the intersection are not now in the picture. Reconstruction work on the old roadway west of the Beusestein crossing, which had been delayed pending a decision on the Kuhl detour, is now being proceeded with.

It is to be regretted that this opportunity to eliminate a level crossing had not been taken advantage of.

Will U B I ?

Friends tell us that our local news columns make good reading. The Editor wishes to make these still better, and will be enabled to do this thru the co-operation of the readers. If you have a big—or little—item of news, kindly see that this information reaches The Sun Office, and we will do the rest!

The World of Wheat.

By H. G. L. Strange, Director Research Department,
Searle Grain Co. Ltd.

"These Registered and Certified seed growers seem to ask a pretty high premium for their seed. Isn't there a way to get it cheaper? a friend asked me last week.

The seed is well worth the price asked; I told him. It takes a lot of extra expense and care to grow Registered and Certified seed, but if you don't want to pay the seed grower for doing the extra work why not do it yourself and save money.

How? was asked.

Lay down a seed field on your farm. Choose 6 or 10 acres of your very best summer fallow, and then buy only a few bushels of Registered or Certified seed, and sow it on this field, leaving an alleyway all round it. Protect the field, rogue it, harvest, thresh and special bin the grain with care, and then by next year you'll have enough seed for a large area.

Oh! answered my friend; that would be a lot of trouble.

Well, that's life all over; either we must go to extra trouble ourselves to produce an extra good thing, or pay some one else to do it for us.

The Plight Of Youth

The phenomenon of young, unemployed men in large numbers wandering aimlessly all over the country in the past two or three months, some of them honestly looking for work and others professedly searching for jobs but hoping to avoid them, has been termed, and not without warrant, a "national disgrace."

There cannot but be sympathy for these youths. Many of them are offspring of thrifty, hard-working parentage. Many of them are fairly well educated, some even holding university degrees. Some of them are well equipped to occupy an honored place in the business and social life of the country and have the right attitude towards work, but they find that industry does not want them, has no place in its crowded ranks where they can fit in.

On the other hand, the ranks of these idle, footloose youth include some who are more shifty than thrifty, some who prefer to shirk rather than work, and some who are outright morose and ne'er-do-wells. Unfortunately in the minds of a section of the general public, there is an inclination to include all of them in the latter category, and this tends to make the lot of those who are willing and eager to work and who are unable to do so through no fault of their own, harder to bear.

Unless something is done to enable these young men to find their place in the social and business life of the country, and particularly those who by upbringing, education and inclination are worthy material for citizenship, their ultimate fate is difficult to predict, beyond the general statement that it can hardly be expected to be creditable for themselves, their forbears or their country.

Action Is Needed

As stated at the outset, one cannot help but be sympathetic towards these youth and grieved at the predicament in which they find themselves, but sympathy alone is not sufficient. Sympathy must be translated into practical action if mental, moral and physical disaster is not to be the goal towards which they press. In other words, a helping hand must be extended if not by private effort, by the governments of the country.

On the face of it the problem seems insoluble until such time as industry has sufficiently recovered from the slings and arrows of misfortune to enable it to absorb them. The only other solution, temporary or otherwise, is for the governments of the country to do something more than is now being done.

It will be argued, of course, that in the west, the federal government has made some provision to take care of these benighted youth by establishing the farm bonus plan and in providing the funds for the operation of youth training classes in the larger centres.

The former has and undoubtedly will again be of some assistance in aiding unfortunate youth but the farm bonus plan, after all, is only a seasonal and very temporary measure. It takes care for a few months of the year of one class of the unemployed young men and only a percentage of the total. Moreover, it does not ordinarily train for or lead in the direction of permanent employment for the great majority of its beneficiaries.

The youth training project, too, has undoubtedly merits. The educational opportunity it affords is excellent and unquestionably those who attend these classes and pursue their studies with diligence, thereby better equip themselves to occupy a place in industry if and when the opportunity to do so appears, but unfortunately it does not, at present, lead to self-support, the natural ambition of every right-minded youth.

Abundant Opportunity

All that youth training does, as yet, is to increase the number who are equipped to compete for the few vacancies that occur in industrial life at a period when trade and commerce, using the term in its broadest sense, has not emerged from the doldrums.

Until such time as industry is able to more adequately provide for the needs and ambitions of the youth of the country it would appear that the only thing for the senior governments to do is to make some provision to enable youth to give vent to its energies in the natural and proper manner through work, and this can best and most profitably be done through the development of the vast natural resources in which the country abounds.

One could list a number of projects which might be undertaken, the prosecution of which would restore moral tone and physical vigor to disappointed youth and at the same time yield some return to the taxpayers who would have to foot the bill. It is hardly necessary to enumerate such development possibilities. One has only to look around and see the opportunities.

There is plenty of work of a beneficial nature to be done and there are plenty to do it. Why not connect the two?

HOW YOU CAN ATTRACT MEN

Don't let love and romance pass you by. Men like girls with lots of pep and energy. So start taking Lineoprene. Lydia E. Pinkham's Vegetable Compound and note the difference. Pinkham's Compound made especially for women from wholesome herbs and roots. Helps restore tone to your system and thus cause irritable nerves and gives you more pep to really enjoy life.

For over 50 years one woman has told another how to get "smiling life" distinct from featureless functional disorder with Pinkham's Compound. Let us help YOU!

Wrong All Around

"Wrong Way" Corrigan still casts his shadow.

Boss: "No."
Clerk: "Thanks." 2278

Campaign For Conscription

Preparations In Britain To Be Ready In Event Of War

Sir Auckland-Edwards, war-time minister of national service, appealed for re-establishment of a government office similar to the one he headed during the Great War, to ensure mobilization of the population for a total war within a few months after the outbreak of a new conflict.

In a letter to The Times, Sir Auckland suggested submission of a simple questionnaire to all British voters to determine their reaction to his proposal, which received the editorial support of The Times.

Viscount Rothermere's Daily Mail intensified its efforts to obtain replies from its readers to a questionnaire asking: "Are you in favor of obligatory military service or organization of a volunteer service?"

Lord Beaverbrook's Daily Express also continued its campaign for conscription of the nation's economic and man-power resources, citing the statement of Frank Fehr, president of the Baltic exchange—one of the world's greater grain markets—in favor of conscription of men for the army and also for industrial and commercial enterprises.

Mr. Fehr said officials of the Baltic exchange were disposed to see their entire organization placed at the disposition of the government.

Something New In Food

Ginger Bread With Buttermilk Said To Be Fine Combination

The columnist of the Baltimore Sun, writes one of his contemporaries, the other day remarked he had found what he called an unusual food combination recently—buttermilk and ginger bread.

"That is a food combination the origin of which would be hard to determine," says the columnist, "but I know it was a very popular combination constantly indulged in on the eastern shore of Maryland from time immemorial. The habit probably drifted down from Pennsylvania, for in every lower Pennsylvania home it is considered one of the best food combinations there ever was."

"Out in Carroll county no farmer's wife would think of offering you buttermilk with—after a slice of ginger bread with it—and if ever there was a combination that could charm away the torments of a hot day it is the torments of a hot day it is a glass of buttermilk right cold out of the springhouse and a hunk of ginger bread made by the recipe that descended to Maryland housewives from the angels. Try it some time on a hot day after a long, tiring walk."

SELECTED RECIPES

MARMALADE BAVARIAN

1 package Orange Jell-O
1 1/2 cups hot water
1/4 tsp. lemon salt
1/2 cup heavy cream
1/2 cup orange marmalade
Dissolve Jell-O in hot water. Add salt. Chill until cold and syrupy. Fold in cream, whipped only until thick and airy, but not stiff. Stir in marmalade. Chill until slightly thickened. Turn into mold. Chill until firm. Unmold. Garnish with whipped cream and additional orange marmalade. Serves six.

CANDIED COTTAGE ROLL

4 lbs. cottage roll
Boiling water
1 tablespoon mustard
Vinegar
Sifted cracker crumbs
Whole cloves
1/2 to 1 cup Bee Hive Golden Corn Syrup
Simmer cottage roll in gently boiling water until tender. Cool in the liquid in which it was cooked, then drain. Remove strainer. Place cooked cottage roll on rack in roasting pan. Smooth mustard to a paste with vinegar, and spread over fat surface of roll. Cover with sifted cracker crumbs, score in diamonds and centre each diamond with a clove. Four corn syrup carefully over the surface. Place in a hot oven, 400 degrees F., to re-heat meat and to glaze surface. Baste carefully once or twice during cooking with liquid in pan.

France Gets More Showers

France and other parts of western Europe receive less rain than the eastern United States, but, since the showers are lighter and more frequent, less water is lost by draining than in this country, where more sunny days and harder rains are more common.

Berlin has four thousand five hundred and fifty-three American residents.

Employs Only Men

No Women Have Ever Worked For Brighton Firm

There are no flowers on the desks of directors of the business controlled by A. R. T. Perry, decorators' merchant, in Brighton, England, and the south coast.

Why? Because, though Mr. Perry employs more than a hundred men and boys in his showrooms, girl employees have been banned from the business house of Perry for nearly 70 years—from the first day that his father opened the shop in Duke street, Brighton.

Boys answer the telephone, do all the typing, make the office tea. Men show women customers round. And boys do all the office cleaning—even charwomen fall under the ban.

Mr. Perry won't have it that he is prejudiced against girls. He even admits that they can excel men in business.

For 25 years he has been a leader of the Brighton and Hove Battalion of the Boys' Brigade, and it is his ambition to give every boy he can a chance in life.

As captain, commanding officer or vice-president of the battalion, he believes in the doctrine of "Give boys a chance."

His businesses are so organized that he claims no boy can find himself in a blind-alley job. All have a chance of rising to the top.

"My husband finds in his type of business that he is lucky enough to carry on without women. But he likes to see them in the home," Mrs. Perry says.

And Mr. Perry's employees? The sales manager at the Duke street branch said with enthusiasm, "We prefer it this way. We don't in the least miss the feminine touch. We are happier without it."

"A female can be a disturbing influence in business. Without her there is less inclination to waste time. Every one has his own job to do and there is no question of 'Don't do that, dear, let me do it for you.'"

"Certainly no flowers on the boss' desk. They'd soon get thrown back if one tried it."

Have Real Problem

Nova Scotia Fishermen Get Very Little For Hard Work

Three Nova Scotia inshore fishermen, after toiling from daybreak to noon, landed 423 pounds of fish.

The Halifax Herald prints the following report of what happened. For the catch, the fishermen were paid \$3.68.

From the \$3.68 the fishermen had to deduct \$1 for delivery to market, leaving \$2.68 to pay for three men's work, gasoline, bait, and upkeep of boat and gear.

Of the 423-pound catch, 324 pounds were sold to retail customers. The consumer paid for those 324 pounds of fish a total of \$30.20.

Housewives paid almost ten times the gross earnings of the fishermen. Whether or not the circumstances in this specific case were exceptional we do not know. But study of prices paid to fishermen and prices paid by the consumer over a period of some weeks shows a very wide gap indeed.—Maclean's Magazine.

A bottle of water, standing outside a California house in 1931, focused the sun's rays with such intensity that the wooden wall was ignited.

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums. Aids digestion, relieves stuffy feeling after meals. *Helps keep your breath healthy! Take some home for the children too—they will love it!* **CS-9**

Features Of The Future

New Architecture Will Be Seen At Coming World's Fair

A preview of the style of architecture to be exemplified in the New York World's Fair is provided by the lavish new metropolitan night club, the Riviera. Every interior wall curves on an arc, giving each room an illusion of far greater spaciousness. The main dining room, a huge oval of 6,000 square feet, belies the compact appearance of the building's exterior.

Other "features of the future" are a disappearing 52-ton roof, a receding stage, a revolving skyline with colored floor lights, a revolving bandstand for orchestra changes, and sliding glass walls which drop at the toss of a switch and open the huge dining room to the Hudson River's breezes.

Had Right Answer

"James," said the teacher, "come in front of the class and spell 'neighbor'!"—and he did so correctly.

"That's quite right, James!" said the teacher. "Now, Tommy, it's your turn. Please tell me what a 'neighbor' is."

After a pause, "Please, miss," said Tommy, "a neighbor is a woman who borrows things."

The curvature of the earth amounts to seven inches per mile.

No Cause For Pessimism

Lord Tweedsmuir Praises Work Of Rehabilitation In The West

Lord Tweedsmuir, governor-general of Canada, told a special convocation of the University of Western Ontario it is "the happy fate of Canada" that it is so far removed from the European political turbulence.

"Canada has, beyond question, great duties and responsibilities, as a sovereign nation and as part of the British empire," he said after receiving an honorary degree from the university. "But she does not live in the feverish atmosphere of the old world. Her problems are mostly long-range problems which can be considered at leisure."

"She cannot exclude herself from the world any more than can any other people and it is her duty to have a policy in international as well as national affairs. But her prime interest is self-development; her chief concern is not with the old world but with the new."

He said Canada has two frontiers—the frontier of thought and knowledge and the physical frontier.

"Let me take first the frontier of thought and knowledge, the drought areas of the southern parts of the prairie provinces. These were long ago mapped and surveyed and settled, and provided with the apparatus of a civilized society. But the settlement was done hastily and unsystematically and the recent dry years have compelled us to retrace our steps. There is no cause for pessimism about the prairies. Our problem is how to make prairie farming weatherproof, to so readjust it that in a bad year a farmer will not be ruined."

Lord Tweedsmuir said the federal and provincial agricultural departments have done "brilliant work" on this problem and the "work of rehabilitation is being admirably done" and I wish it were better known.

"No less brilliant is the handling of the question of soil drifting. In this prairie question Canada is showing the true frontier spirit; confronted with a desperate problem, she is solving it by pushing further forward the frontier of thought and knowledge."

The physical frontier is in the northwest, he said, with its chief wealth underground.

Comparing the Canadian northwest development with Russian development in northern Siberia, Lord Tweedsmuir said he thought "we have in our north far greater assets than any that Russia can claim."

The frontier work offers no occasion for grandiose dreams as the problems are difficult and many will only be solved by toll and patience of many years, his excellency continued.

A Real Necessity

Livestock Should Have Adequate Salt Supply

A reminder that livestock should not be denied a complete salt supply during the winter months is appropriate at this time. Practically all farmers make it part of their regular "spring program" to put 50-pound blocks out in the pasture for use during the daily period outdoors, but a more satisfactory solution has been provided recently through the introduction of five-pound salt licks. Specially designed for individual use in stables, these five-pound licks enable each animal to have its individual salt supply from which it may judge its own needs.

The need for salt continues all the year round and the livestock should not be denied free access to salt during the months when they are mostly confined in stables. The old method of providing an open salt supply was to place one or two 50-pound salt blocks in the barn yard for use during the daily period outdoors, but a more satisfactory solution has been provided recently through the introduction of five-pound salt licks. Specially designed for individual use in stables, these five-pound licks enable each animal to have its individual salt supply from which it may judge its own needs.

Iodized salt licks of the same size and mineralized licks, containing supplementary calcium, phosphorus and iodine, afford an equally convenient method of counteracting in some measure the inadequate supplies of these essential minerals in the livestock ration. Another popular method of supplying minerals is to give soluble minerals, which contain 25 per cent salt, in the feed.

EVACUATING CHILDREN FROM LONDON

This photograph shows a group of deaf girls carrying their bedding when they left the London County Council's Residential School for Girls in the southwest of London to go into Buckinghamshire as part of the air raid precautions when war seemed a certainty.

Canadian Button Factories

Have Greatly Increased Their Output

During Last Seven Years
Ivory nuts for the making of vegetable ivory, blanks of shell in the rough, unmanufactured mother of pearl, celluloid, xylonite, artificial horn, steel, brass and what not—the button makers of Canada use many kinds of material for the multi-shaped, multi-colored and multi-sized ornaments and fasteners that men, women and children wear on their clothes. Buttons manufactured in Canadian button factories (in addition to those manufactured elsewhere in the Dominion) were worth nearly \$1,600,000, factory value, in 1937, and manufactured imports added nearly \$500,000 to this sum; almost \$2,000,000 worth of buttons altogether, and costing the public no one knows how much more by the time the various intermediaries took their profit.

Canadian button factories last year made 1,410,000 pearl and fresh water pearl buttons, 447,000 metal buttons, nearly 446,000 vegetable ivory buttons, 244,000 artificial horn or goliath buttons, 78,500 celluloid buttons. The zipper has become popular, but it has not killed the button. There are religious sects which think buttons are sinful and use only hooks and eyes, but their numbers are not numerous.

Output of Canadian button factories in 1937—\$1,500,442—compares with only \$702,470 in 1930. Since then it has increased every year.—Toronto Star Weekly.

Done On Big Scale

The fellow had just got back from Hollywood, says London Tit-Bits. He had been dazzled by the display of glamor and greatness in the movie colony. "Everything is done on a tremendous scale," he related to friends. "I attended dinner at a movie producer's home one evening; and, instead of using finger-bowls at the end of the meal, all the guests took showers!"

Adjunct To Airplane

New Robot Direction Finder Can Ferret Out Hostile Ships

A new robot of this mechanical age, which virtually takes an airplane by the nose and leads it to its destination, may become an adjunct to the United States national defence in spotting enemy warships.

The device, called an automatic direction finder, was turned loose, bloodhound-like, on Long Island, and within 20 minutes had ferreted out a low-power radio station which a naval reserve unit had hidden near Valley Stream.

Mounted on a truck, the sending station had been parked under the eaves of a hangar.

Taking off from Floyd Bennett airport, the crew of a commercial airliner equipped with a new direction finder was instructed to find the sending set. Its wave length, was provided the searchers.

The pilot turned a knob which tuned the device to the proper wave length. A needle on a dial swung around to indicate the direction in which the quarry lay. The pilot, who by this time had flown almost 40 miles in the opposite direction, set his plane on the line of flight dictated by the needle.

The navy truck not only was found but was photographed by evidence.

Observers said the direction finder, described as more accurate than similar devices previously used, and almost immune to static conditions, could be employed to detect the aircraft carriers of a hostile fleet as they contact their warplanes by radio.

The first recorded experiment in electricity took place 60 years before the birth of Christ, when the Greek, Thales, of Miletus, rubbed pieces of amber and observed they attracted light objects.

Maine is said to be the only state in the Union which harbors no poisonous snakes.

A Faithful Dog

Travels A Thousand Miles Of Wilderness To Find His Master

Pinch was only a yellow dog but he travelled a thousand miles of northern wilderness to find his master. He died as he reached him, his blood-caked muzzle resting on a slab outside his owner's cabin door.

The homely mongrel, his dirty hide packed with faithfulness, belonged to William Cawkin, 60-year-old gold prospector of Connelly Creek, about 200 miles north of Williams Lake, B.C.

Last August Cawkin visited an old friend, Daniel Burley, trapper and hunter of Fox Creek in the Alberta Peace River country. Burley wanted Pinch and Cawkin reluctantly parted with him and returned home alone.

One cold night recently, with a bitter north wind blowing outside, Cawkin from his bunk heard a scuffling outside. He thought perhaps it was a skunk.

But next morning he found instead his dog, dead, torn and mangled from a trek over rivers and mountains and through tearing brush and rock. The frozen paw pointed toward the closed door.

Cawkin said the animal must have travelled 1,000 miles to make the distance of 700 miles as the crow flies.

He buried Pinch under a wooden cross and carved on it, "Greater love hath no man."

Proved It Himself

Nothing To Spiritualism, Opinion Of Houdini's Widow

Mrs. Harry Houdini, widow of the magician, said that after ten years of trying to contact the spirit of her husband, she felt that she had proved there was nothing to spiritualism. The magician and his wife agreed to contact the spirit of the other when one of them died. "After the last séance almost two years ago, I stopped trying," Mrs. Houdini said.

Worked Out Original Plan

Designer Has Perfected Boat Planned By Lawrence Of Arabia

A plan for squadrons of 80-military-hour death ships, each one of which could kill a thousand men in five minutes, was the secret which Lawrence of Arabia took to the grave when he crashed to death three years ago. This was revealed after Lord Strabolgi, behind the closed doors of a Slough (Hants) engineering factory, had christened a 16-foot speedboat, capable of 85 m.p.h., which Lawrence helped to design.

When this boat—Empire day—attacks Italy's 400-hillgram world record on Lake Windermere, admiralty chiefs will be watching, for it is on this craft that Lawrence planned shoals of 100-foot torpedo boats which he contended would wipe out an entire enemy fleet in less than a week.

If trials are a success, the government is expected to place orders for squadrons of these vessels. The only man who knows Lawrence's secret, Edward Spurr, 31-year-old designer, is confident he will break the world record by at least ten miles an hour, and thus make Britain the most feared nation on the sea.

"The boats," he says, "would operate in squadrons, like the R.A.F., and they would attack enemy ships from all angles. They will revolutionize sea-fighting tactics. If we had had these boats in the Great War the Battle of Jutland would have been over in 10 minutes," he claimed.

When Lawrence was killed in a road crash, Spurr carried on, and following five years' research he perfected the boat.

Although only 100 feet long, it will carry four 21-inch torpedo tubes, powerful gunnery and depth charges. Torpedoes could be released at 80 m.p.h. from under the boats without being seen by enemy vessels. One boat could scuttle four hostile battleships with direct hits in eight seconds.

When the idea for these death ships came to Lawrence he and Spurr worked for months making models with matchsticks and old metal.

"Lawrence could not get any of our inspirations in sleep at my lodgings in Southampton," Mr. Spurr says. "Lawrence had a great analytical mind. Although he was not an engineer he had amazing mechanical understanding, and he could put his finger on a weak spot and suggest modifications to get out of difficulties."

"The great secret is that torpedoes can be fired fore and aft at two-second intervals without being detected. They can ship 200 men at a time, from point to point at great speed, which would make them vital in a blockade."

The fastest vessel of its kind in England today has a top speed of 40 m.p.h.

Colonel T. E. Lawrence—became known as Lawrence of Arabia mainly because of the way he rallied the Arabs to the British cause in the Great War. And I found him returned to England and lived in retirement in Dorset for some time. Then, for a while, there was some mystery concerning his whereabouts, and eventually he was found serving as an ordinary airman in the R.A.F. under the name of Shaw.

Wanted Quiet Place

Isabel MacDonald Buys Farm Because Inn Too Noisy

So busy is her hostelry, the little Flow Inn, the picturesque little tavern in the Chiltern Hills, that owner Mrs. Norman Ridgley, the former Miss Isabel MacDonald, has purchased a farm nearby for quiet and peace.

It was soon after her father, ex-Financial Minister Thomas MacDonald, died that Miss MacDonald bought the tiny hostelry, explaining that she felt many hikers like herself would appreciate a comfortable place to rest. But now hundreds of visitors pour into the inn at Epsom, Buckinghamshire, to inspect the premises.

Most of the visitors to Flow Inn seem to expect that the one-time mistress of No. 10 Downing Street, where she was her father's official hostess, will stand behind the bar and draw their beer with her own hands, as rumor credits her with having done before her business took on such unusual proportions. 278

DESPAIR!

Foreigners and Jews attempting to leave Prague with what few possessions they can carry, fearing persecution as a result of German domination of Czechoslovakia.

WORLD HAPPENINGS BRIEFLY TOLD

The Smithsonian Institution announced invention of a new instrument which will measure the heat of a star billions of miles away.

More than half of the 4,000 United States volunteers who took up arms in the Spanish civil war apparently have been lost in action.

Red Cross officials estimated they would require \$50,000 for the work of rehabilitating families who lost their homes in forest fires in the Fort Frances, Ont., area.

The New Zealand government is sending to England 30 airmen for training, to return as pilots in the 30 Vickers aircraft recently purchased in England.

Members of the British Legion, ready to sail for Czechoslovakia, to police the proposed plebiscites in mixed population areas, were advised their services would not be required.

A meteor, throwing off a stream of sparks and followed by a trail of flame, is reported to have fallen southwest of Ottawa. Efforts to locate it were unsuccessful.

An extensive campaign against return of any part of Windhoek to Germany is planned by a "Southwest African League" now being formed there.

Lord Stanley, dominion secretary and heir to the Earl of Derby, who visited recently at a London clinic, visited Canada and opened the Canadian National Exhibition at Toronto this year.

Recruits continue to enlist in the regular army in increased numbers despite the protracted solution of the European crisis, the War Office announced. In a recent week 949 were enrolled, 528 more than in the corresponding week of 1937.

To Meet Emergencies

Proposal For British Test Mobilization To Be Held Annually

A plan for an annual test of mobilization of Britain's civilian population to meet any emergency of the future has been placed before the committee of imperial defence by Calgary-born Brig.-Gen. A. C. Critchley.

The scheme is based on precautionary measures evolved by the sports promoter 18 months ago and applied to his vast enterprises during the recent crisis.

At that time a large number of his employees were promptly released for duties with the Territorials, the balloon barrage, and the air raids precautions organization, but pre-arranged programs were carried out without a hitch by the immediate introduction of a shadow plan.

General Critchley now proposed that the civilian population should similarly be organized and called up for a test drill next summer. He suggests a trial evacuation of congested areas, the manning of all branches of the defence service, and mobilization on the basis of a national register with a minimum of disturbance in industry.

Poultry For British Guiana

B.C. Poultry Breeders Supply Foundation Stock At Good Prices

So satisfactory has a shipment of record-of-performance poultry from Canada to British Guiana made last year proven to be that the Department of Agriculture of that country recently placed another order through the Dominion Department of Agriculture. This recent order is for eight white Leghorn pullets and two males and eight Rhode Island Red pullets and two males, all of record-of-performance breeding stock. The birds are now en route to British Guiana. The shipment was purchased from two British Columbia poultry breeders. The satisfactory price of \$15 each was paid for the pullets and \$25 each for the males, f.o.b. breeders' farms. These birds, like last year's shipment of Harrow Plymouth Rocks, are to be used for foundation breeding stock in British Guiana, where poultry raising is becoming an increasingly important industry.

Beef and cabbage cooked together comprise the English dish of "bubble and squeak."

Australia's first factory for making Axminster carpets is being built.

For Healing Wounds

New Oxygen Treatment Is Shown American College Of Surgeons

Oxygen loosely locked up in grains of white powder was reported as a new treatment for healing wounds rapidly.

The process was shown to the American College of Surgeons at a clinic at Presbyterian Hospital by Dr. Frank L. Meleny.

Oxygen, it was explained, is supposed to owe its healing power in wounds to its ability to drive out the kind of bacteria which live without oxygen. They are known as "anaerobes" and include some of the serious sources of infections.

The obstacle to using oxygen has been its quick evaporation from the wound. The powder is a new product of chemistry, zinc peroxide.

It is dissolved in liquid and flushed through a wound. The heavy zinc particles spread through the injured tissues and lodge there. Each grain of the zinc theropein becomes a slow fountain of oxygen. It keeps on giving off oxygen for several hours.

Books as part of the cure after an operation were urged by Gordon R. Kamman, M.D., of the University of Minnesota.

The right books, he said, will help in recovery, and the wrong ones will make the patient worse.

"Too few people," he said, "are aware of the possibilities of reading in the treatment of medical, surgical and psychoneurotic patients. The individual must be regarded as a whole and we no longer cling to the dualistic concept of man in which the mind is considered separately from the body."

"To allow outsiders to supply patients with reading material unsupervised is as bad as allowing them to bring the patient his diet or medicine."

The right books, Dr. Kamman described as those which take the patient's mind off himself. The "so-called third business man," he said, is a tough subject for books because as a rule this man has had so busy making money he never has had time for reading and is not interested.

A Suggestion Made

A Little Discussion Over The Regal Visit To Toronto

Neither Toronto nor any other city is entitled to claim a prominent place in a three-week visit of the King and Queen to Canada. It goes without saying that Toronto people will be proud and delighted to have the royal visitors as guests for as long as it is convenient for them to stay, but when a communication to that effect has been forwarded to those in charge of the Canadian visit, that is as far as Toronto's importunities should go.

The suggestion which has emanated from the Earl of Connaught, Mayor Day should write to Lord Tweedmouth stressing Toronto's claim to a prominent place in the royal plans is the type of thing which has earned for this city the opprobrious sobriquet of Hystoria. Without any thought as to the national character of the visit, it is proposed that a letter in this sense should be forwarded to Ottawa "so that a lengthy visit to this city would definitely form part of Their Majesties' Canadian itinerary."—Toronto Telegram.

Have Become Important

Skins Of Rats And Mice Are Of Value To Japan

Rats and mice are ordinarily thought of in Japan, as elsewhere, as unmitigated pests.

But in the present period, when substitute materials are being sought on every side they have been included in the general scheme of "commodity mobilization."

Their skins, it is asserted, can be tanned and used as material for knapsacks, brief cases, vests, lining of coats and other articles which are usually made out of more valuable materials.

The market for dead cats and dogs is rising for the same reason, the value of their skins.

The prices of the various animals are reported as follows: Five to seven yen (six to eight shillings) for a dog, one yen for a cat, ten sen for a rat, and five sen for a mouse.—London Observer.

According to one London magistrate, "Boxing the ears is the most dangerous way of hitting anyone."

GOOD NEWS FOR LARGER WOMEN

By Anne Adams

of 4920

Turn your eyes towards winter and you'll discover many a need for this flattering frock—especially designed for the larger figure up to size 50. Don't you like the scalloped neckline? It lends such dainty distinction to an otherwise simple silhouette. The pockets and the ruffing edge are other chic details. As for the panels at front and back, they slenderize to an almost magical extent—because they flow the full length of the dress. Indeed, you can't find more becoming lines or greater comfort in any style! When you consider the making, remember that there's a Sewing Instructor to help you! Choose chambray, percales and the silk. Send for this pattern today. Pattern 4920 is available in women's sizes 36 to 60. Size 36 takes 4½ yards 36-inch fabric and 1½ yards ruffing. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Adams pattern. Write plainly: Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

U.S. Defences

Mass Production Of War Equipment Is Indicated

President Roosevelt said he was making an entirely new study of the United States national defence needs and that until it was completed he could not estimate next year's budget.

The president told a press conference new technical developments in national defence measures required a complete study of defensive requirements.

He said the reason for the reassessment of these needs began to take shape about a year ago because of information coming in in connection with world events. He said the question was forced to a head in the past month. In response to a question he said the new information was of a technical rather than a political nature.

One of the things being studied, he said, was that of mass production of war equipment, including airplanes, power and other items. He said the production question was something new and indicated one phase to be studied was standardization of "plane production, which some countries already have adopted."

New Use For Silver

Silver-Coated Food Containers A Possibility Of The Future

Consumers some day may be able to buy their soup and succotash in silver instead of tin cans, if experiments revealed at the International Electrochemical Society meeting prove practical. Silver-coated food containers were just one of the possibilities suggested for the metal. Dr. Lawrence Addicks of Bel Air, Md., told the electrochemists that when the government stops supporting the market by buying more silver than it needs, scientists are going to have to take up the slack with industrial uses.

SUNDAY SCHOOL LESSON

OCTOBER 30

PERSONAL RIGHTS AND WHERE THEY END

Golden text: What then? shall we sin because we are not under law, but under grace? God forbid. Romans 6:15.

Lesson: Ecclesiastes 2:1-3, 10, 11; Romans 6:17-22; 14:21.

Devotional reading: I Corinthians 6:9-11.

Explanations And Comments

The Quest of the Chief Good through Enjoyment, Ecclesiastes 2:1-3. In the first chapter the writer has been discussing his quest for the highest good in the shape of wisdom. That quest proved unsatisfying, and he now turns to enjoyment as the source of the highest good.

The Vain Quest through Possessions, Ecclesiastes 2:7-11. The writer indulged in every desire of his heart, acquired slaves, herds and flocks; precious metals, musicians, and inmates of the harem, but, as before, all was vanity, a striving after wind, and there was no profit under the sun—none of the things could satisfy him. I withheld not my heart from any joy.

The "Expositor's Dictionary of Texts" quotes these remarks of Paine on Adam de Moliere: "He desired much; he wished strongly and greedily to taste life in one draught, thoroughly; he did not desire to savor it, he tore it off like a bunch of grapes, pressing it, crushing it, twisting it, and he remained with stained hands, as with thirsty as before. Then broke forth sob as which found voice in his heart."

The Highest Good, Romans 6:15-23. The "One-Volume Commentary" paragraphs as unreservedly as follows: Some assert that if they are no longer under law they may indulge in sin. Important! You belong either to sin or to God; you cannot belong to both. Although you were the servants of sin once, you are now taken to Christian teaching as your rule of life, thus exchanging the service of sin for the service of Righteousness. The illustration is inadequate, for you are better than slaves, you are God's children. But I want you to see that you must now devote your bodies to righteousness and sanctification as unreservedly as once you devoted them to impurity and license. Formerly, you served sin only, and the only reward you had to look for was eternal death. Now you serve God only, a service leading to sanctification, with everlasting life in prospect. Make no mistake. Those who serve sin receive the death they have deserved. But God gives to his servants what they could never earn, even everlasting life in union with Christ.

Abstinence for the Sake of Others, Romans 14:21. If anything that you do would cause a brother's fall, avoid it for his sake.

Heavy Investments

Large Sum Of United States Money Invested In Canada

United States investments in Canada amount to \$5,630,000,000—more than one-third of the total United States investments abroad and by far the largest block of the total, according to a survey by the United States Chamber of Commerce.

The complete statistics for 1937 show that in addition to the Canadian investment, United States investors had placed \$2,562,000,000 in South America, \$2,372,000,000 in Europe and more than \$800,000,000 in the West Indies.

The survey also disclosed that expenditures of Canadian travellers in the United States account for two-thirds of the total travel outlays by foreigners in the United States, while United States travellers in Canada spend here half of the total travel outlay of the United States.

The Last Word

Newspaper Writer Slipped Something Over The Publisher

Christopher Morley, the American novelist, at the time he conducted a column in the Philadelphia Public Ledger, then owned by the late Cyrus H. K. Curtis, also publisher of the Saturday Evening Post.

Curtis was piqued at something which Morley wrote and gave him his notice. In the last column he was to publish in the Ledger, Morley inserted an apparently meaningless line: "Taming of the Shrew, Act IV, Scene I, Line 36."

Readers chuckled when they looked up the reference, for it read: "A cold world, Curtis, in every office but mine; and therefore here!"—Winnipeg Tribune.

Mercury must be present in an alloy before it can be called an amalgam.

The Olympic Games were revived in Athens in 1906.

Engines Of War

Best Way To Combat Air Raids Is To Meet Invaders In The Air

A Great War veteran who has scrutinized the "terrible engines of war" finds them neither as fearsome nor as awe-inspiring as one might expect.

Col. E. J. C. Schmidlin, director of engineering services, department of national defence, told members of the Engineering Institute of Canada at Toronto that in spite of advances in design and fire-power of modern military weapons, conditions in any future war would be no worse than those of 1914-18.

Each advance in weapons of offense, he said, has been offset by corresponding improvements in defensive armament.

Best defence against air raids, he declared, was to meet the invaders in the air before they reached their objective. A fleet of fast pursuit ships could cope successfully with the attacking ships, he asserted.

If this method had been followed in the Spanish war, he doubted if the insurgent airmen would have caused the damage they did.

Tooth Decay

Physicians Claim To Have Isolated Germ That Causes Trouble

Isolation of the germ that causes tooth decay was reported by Dr. P. H. Belding, dentist, and his brother, Lieut. L. J. Belding, physician attached to the naval academy at Annapolis, Md.

The germ is nurtured, they said, in foods made from cereals, mostly wheat, corn and oats. The fermentation of these foods causes acid in the saliva which attacks the tooth enamel. The germ can be eliminated by processing the cereal, they said.

They made their report to the First District Dental Society of the State of New York.

They believed that their discovery might open the way for a new study of the dietary diseases, such as peptic ulcer, gall stones, arthritis, appendicitis, pernicious anemia and rheumatism.

One way of destroying the germ, they said, was by fermentation or alkalization of the cereal before consumption.

Trains And Planes

For Many People Locomotive Will Never Lose Its Glamor

The other day, says B. H. H. in the Victoria Times, I kept abreast of a heavy grain train down the Fraser Canyon for miles and miles, so close that I could see the tobacco glow in the bowl of the engineer's pipe, and I found that I wished them, as intensely as when I was seven years old, that I was a locomotive engineer, with a giant of steam under me. In time, I dare say, the airplane may acquire a glamor like that, but not for many years. We may use it but we shall never love it as we love a train. An airplane is a new thing, in boyhood, and the sound of its whistle will always remain in our hearts.

It is said that one of the reasons given by Louis XIV. for the building of the great palace at Versailles was that it would provide employment for 30,000 workmen over many years.

An excellent lubricant for squeaking doors and other parts of a car is a common wax crayon.

REPORT MOISTURE CONDITIONS IN THE WEST AS VARIABLE

Winnipeg.—Autumn sub-soil moisture conditions, on which the farmer usually pins his hopes for next year's crop, range from poor to excellent over the three prairie provinces, a survey shows. Saskatchewan and Alberta reported conditions fairly promising but Manitoba farmers generally considered the outlook unfavorable at the moment.

However, appearance of soaking rains before frost strikes and plenty of moisture during next spring and in the growing season will alter the Manitoba picture.

Weather bureau officials said the records of precipitation by inches from Sept. 1 showed Saskatchewan so far with 1.90, Alberta 1.72 and Manitoba with .36, far below normal.

Grain firms also reported Manitoba wheat lands suffering from a late summer and fall dry spell. The Searle Grain Company, Limited, in a review of August and September, described the Manitoba situation as 57 per cent. of normal, Saskatchewan 98 and Alberta 93.

Saskatchewan government officials said the situation ran from good to excellent with one poor spot in the extreme southeastern part of the province where few rains have occurred since the harvest. Alberta authorities, preparing a sub-soil moisture survey for release Nov. 1, described conditions as fair to favorable.

Manitoba farmers in areas just south of Winnipeg declared the soil was so dry they were unable to accomplish fall plowing properly. For more than a foot beneath the surface at some points the earth held no moisture.

"There is a distinct below-normal moisture condition in Manitoba this fall," Hon. D. L. Campbell, Manitoba minister of agriculture, said. "I consider that one of the biggest single factors in the next year's crop is moisture we get the fall before. Storing up reserve moisture acts like a bank account in any other business."

"Manitoba lacks that reserve moisture and is more than usually dependent on next spring elements. The lack of moisture this fall doesn't mean we can't get a crop next year. The crop will come along providing we get satisfactory weather conditions during the spring and growing season."

Mr. Campbell, who said he was like every other farmer who believed crops never come up to expectations, declared the condition of the land this fall was distinctly below the long-time average. Good fall rains after Oct. 20 were not very beneficial as freeze-up usually had set in and moisture could not seep into the earth.

Annual Spring Shows

Dates For Western Canada Have Been Announced By Secretary

Saskatoon.—Dates of the annual spring shows for western Canada have been announced by Sid W. Johns, secretary of the Western Canada Association of Exhibitions. The dates follow:

Brandon, week of March 13; Saskatoon, week of March 20; Regina, week of March 27; Calgary, week of April 3, and Edmonton, week of April 10.

Canada's First Entry

Saskatchewan Man Exhibiting Alfalfa Seed At Chicago's 1938 Show

Chicago.—Canada's first entry for the 1938 International Horticultural Show here Nov. 26-Dec. 3 was made last week by H. A. Myers, a Saskatchewan grower. The show is held in connection with the International Livestock Exhibition. Myers will exhibit samples of alfalfa seed, grown this year on his farm near White Fox.

No Tugs Required

New York.—The Queen Mary, largest ship afloat, docked last week—in perfect weather—under her own power because of the New York harbor tugboat strike. The liner brought 1,461 passengers and \$25,000,000 in gold from Europe.

To Establish Peace

Says Democratic And Dictator Countries Should Bury Differences

London.—Joseph Kennedy, United States ambassador to Great Britain, declared that democratic and dictatorial countries should bury their differences and seek to re-establish good relations in a world threatened with disaster from a mad armament race.

Speaking at the annual Trafalgar Day dinner of the Navy League, Mr. Kennedy praised Prime Minister Chamberlain's "all but superhuman efforts in behalf of peace" in the recent crisis. He said, however, that "only history will show whether or not he made the right decision."

In the light of that crisis, Mr. Kennedy said, "it is hard to quarrel with the decision of any nation to build up its military forces; in fact we can only commend such action on the part of those sincerely committed to a policy of peace."

But he expressed the belief that the armaments burden was approaching the point "where it threatens sooner or later to engulf us all in a major disaster," and "for this reason the American people look forward to the day when the nations of the world will realize they must agree upon limitation and reduction of armaments."

The ambassador declared it had long been his theory that it was "unproductive for both democratic and dictator countries to widen the division now existing between them by emphasizing their differences, which are self-separating."

"Instead of hammering away at what are regarded as irreconcilables they would advantageously bring their energies toward solving their common problems and attempt to re-establish good relations on a world basis."

May Call Parliament Early

To Make Prorogation Possible Before King and Queen Arrive

Ottawa.—While no definite decision has been reached, Rt. Hon. Ernest Lapointe, minister of justice and acting prime minister, disclosed the government had been considering the possibility of calling parliament before Christmas.

It would not be a "fall session," the minister explained, but, in view of the visit of the King and Queen to Canada early next summer, it might be deemed advisable to have the regular session called before Christmas so prorogation could be reached earlier than usual.

Customarily, parliament is called in January or February for the annual session. For some time there has been a report a special fall session or early assembly of the regular session would be called to deal with the Canada-United States trade agreement now being revised at Washington.

Mr. Lapointe did not say the trade agreement had entered into the government's consideration in connection with a possible early session. He said there was no news to indicate when the agreement would be ready for signing.

Interviewed after the regular weekly cabinet council, the acting prime minister said it would be desirable to have parliament prorogued before the King and Queen came to Canada. If parliament meets this fall it will probably be late in November.

ASKS DUCES' LENIENCY

Italy's decrees against Jews might have serious repercussions in the United States, Supreme Court Justice Salvatore A. Cotto (above) of New York cabled Premier Mussolini, requesting an audience before the decrees go into effect. Cotto, son of an Italian immigrant, is a Knight Commander of the Crown of Italy.

May Visit Callander

Dr. Dufoe Is Hoping Royal Visitors Will See The Quints

Toronto.—Dr. Allan R. Dufoe, Dionne quintuplet physician and guardian, said he "hoped" King George and Queen Elizabeth would be able to visit the five kiddies at Callander during their visit to Canada next year.

"We hope that when the arrangements are made for the royal itinerary," the doctor said on his arrival from Buffalo, "a stop may be included at North Bay on either the westbound or return journey, to enable the King and Queen to come and see the quintuplets at Callander."

"Speaking in Buffalo, in humorous vein, I said that while ordinary people went to see the King, the King would have to come to see the quintuplets. No disrespect was intended and I am sure their majesties would be the first to appreciate the impossibility of bringing the children to them."

Shows Profit

Manitoba Pool Elevators Have Good Surplus

Winnipeg.—Net surplus of \$728,000 after paying operating expenses for the last year was shown by the directors' report considered at the annual meeting of Manitoba Pool Elevators, Ltd. Liquid working capital of the company is in excess of \$800,000. To reduce principal on terminal indebtedness \$50,000 was paid. Pool Elevators now own three terminals at the head of the lakes with total capacity of 4,526,000 bushels, the third one having been purchased at the beginning of the present crop year.

During the past season the company operated 155 country elevators in Manitoba. Total receipts amounted to 18,035,921 bushels, slightly more than 27 per cent. of all deliveries in Manitoba.

Would Halt Arms Race

Report That Prime Minister Chamberlain May Open With Hitler London.—Havas News Agency said it was reported in government circles that before Prime Minister Chamberlain throws Great Britain's armaments machinery into high gear he will make a personal appeal to Chancellor Hitler for an arms limitation agreement.

In this connection, Havas noted, Sir Neville Henderson, British ambassador to Germany, left Berlin for London to spend about a week here. The news agency added that if Mr. Chamberlain takes the initiative toward limitation talks with Hitler, his plea will probably concern land as well as air armaments; past experience has indicated only qualitative limitation of land armaments can be hoped for.

It is taken for granted in London, said Havas, that France and United States would support any move toward a halt in the arms race. United States Ambassador Joseph P. Kennedy, in an address to the Navy League, spoke in favor of limitation.

Receives Decoration

Col. Charles Lindbergh Presented With Order Of German Eagle

Berlin.—Col. Charles A. Lindbergh received one of Germany's highest decorations—the Order of the German Eagle—in an unceremonious presentation Tuesday by Field Marshal Hermann Goerring.

The decoration came at a reception Hugh Wilson, United States ambassador, gave in honor of Lindbergh and Goerring.

As Goerring passed down the receiving line he paused when he came to Lindbergh, telling him he had orders from Reichsfuehrer Hitler to give him the decoration as a token of Germany's esteem of what Lindbergh had done for aviation.

The American aviator replied with a simple "thank you" and hung the decoration around his neck without any of the usual ceremonies attending bestowal of the honor.

First Line Of Defence

Says Newfoundland Is Bulwark Against Air Raids

Toronto.—Canada's first line of defence against air invasion is Newfoundland, Sir Alfred Mordaunt, K.C., former minister of justice in Newfoundland, told the young men's section of the Toronto Board of Trade.

Should a foreign navy capture Newfoundland it would be provided with an air base from which to send raids against cities along the St. Lawrence River, Sir Alfred said.

Federal Aid For Fire Sufferers

Ottawa.—Federal grants of \$25,000 to the Canadian Red Cross to aid the fire sufferers in the Port Frances district of northwestern Ontario and of \$15,000 to the municipality of St. Luc de Matane, Quebec, recently damaged by fire, were announced by Hon. Ernest Lapointe, acting prime minister.

Record For German Plane

Berlin.—The German mail plane Nordstern claimed the record for the fastest trans-Atlantic crossing between New York and the Azores, landing at Horta after 11 hours and 23 minutes of flight at an average speed of 324 kilometres (201.32 miles) an hour, D.N.B., official news agency, announced.

BRITISH TROOPS SUBDUED ARABS TO ESTABLISH ORDER

Jerusalem.—Approximately 1,000 Coldstream Guards marched into the city of Jerusalem and delivered the district from the hands of Arab rebels who had held it for four days. Wearing rubber-soled shoes for sure footing over the ancient cobbled streets, the guardsmen entered the old city through historic Damascus gate and almost immediately were met by a strong fusillade of rebel fire.

Within a few hours the troops had subdued the Arabs without loss of a British life. At least nine Arabs were killed, and 40 taken prisoner. Two British constables were wounded.

British authorities established complete law and order in the old city, which they had surrounded without attempting to enter. Silence hung over the quarter as the guards patrolled the streets.

The Christian and Jewish population showed intense relief as troops marched down the narrow, deserted streets to the mosque of Omar area, which they cordoned off.

Troops and police then began a methodical house-to-house search of the district between the mosque and the old city walls.

Local authorities distributed bread to residents.

All male occupants of houses in the Bab Hutta quarter of the old city—about one-fifth of the total area—were examined by police for rifle butt marks on their shoulders in the same manner that Spanish soldiers in their civil war examined civilian captives for evidence of having fought.

Many of the Arab hand which had held control of the Moslem section escaped Tuesday night ahead of the British expedition.

Some slipped through subterranean tunnels, others by lowering themselves with ropes suspended on St. Stephen's gate.

Troops patrolled the main roads between Haifa and Nazareth, Tiberias, Safed and Acre.

The Coldstream Guards marched into the old city shortly after a form of martial law was proclaimed throughout Palestine to aid 20,000 British soldiers in their attempt to crush the uprising of an estimated 10,000 tribesmen.

Planes dropped proclamations on the new city of Jerusalem, outside the walls of the old city, warning everyone to stay indoors all day because of the military operations. The proclamation was signed by Major-General Sir O'Connor, British military governor and commander of the Jerusalem district Tuesday.

The British are resolved to bring under control sabotaged railways, restore crippled communication systems, occupy more active rebel centers and establish security on the highway.

Food Ship For Spain

Canadian And American Farmers Gave 70,000 Bushels Of Wheat

Regina.—Gift of hundreds of Canadian and American farmers, 70,000 bushels of wheat starts for Spain aboard the Canadian-American food ship Erica Reed on Oct. 30 from New York. Besides wheat, the freighter will carry other food, clothing and medicines donated by Canadians and Americans. The cargo will total 9,000 tons.

To speed the shipment, all will be loaded at New York, though originally it was intended the Canadian donations be loaded at Montreal.

Endorses Czech Plan

Winnipeg.—Mayor John Queen, of Winnipeg, heartily endorsed proposals to settle Czechoslovakian refugees in Canada. "I think Canada and all other civilized countries should do all they can to provide asylum for these people," he said.

Scarcity Of Sardines

Deer Island.—Scarcity of sardines in this Maine border district has led to an increase from the ordinary rate of \$10 per bushel to a top price of \$30. Shippers reported the sardine run is unusually small.

FIRST HONORS TO CANADA

The team from Ontario Agricultural College, Guelph, which won first place in a field of twenty-six in the Collegiate Dairy Cattle judging contest at the National Dairy Show held at Columbus, Ohio. The team made a score of 5,371.4 points out of a possible 6,000 in the judging of all breeds of cattle. Three weeks earlier, at the Eastern States Exposition at Springfield, Mass., the same team won the major honors from eleven United States colleges. Right to left: Prof. G. E. Rathby of the O.A.C.; B. S. Bees, F. J. Archibald, G. R. Bagg and L. T. Bonley.

American Speaker Believes Greatest Protection of Peace Is the Strength of Britain

"I cannot help but hope and pray that the spirit of the Anglo-Americans through the centuries will continue to animate our public policies on this continent," declared Major Norman Allan Imrie, associate editor of the Columbia Dispatch, Columbus, Ohio, concluding an address on "This Briffrid World" at the luncheon of the Canadian Club in the Chateau Laurier at Ottawa.

Major Imrie told of some of his impressions derived from a visit to Europe some months ago. He said: "We ought never to forget the great debt we owe to the old barons at Runnymede who secured the signing of the Magna Carta. Nor those who shook their fists in the face of Charles I. and secured the Petition of Right, those who secured the Bill of Rights from William and Mary, the men who wrote the Declaration of Independence, the fathers who wrote the Constitution of the United States and the framers of the British North America Act."

War lords had since arisen and jeopardized freedom. But constitutional freedom had been maintained by the English-speaking peoples. He hoped the relations that had existed between the United States and Canada would perpetuate themselves.

If the Great War had been fought, as was said, "to make the world safe for democracy," and for this 10 to 12 millions of men were "butchered," and many millions more were maimed and blinded, then I think that war was one of the colossal and ghastly failures of history," in view of what had since happened.

It was true the Russians had got rid of the Romanoffs and established a Duma, but how quickly that picture faded.

"We thought we had made 65 million Germans safe for democracy, and sent the Kaiser to buccawood. But that picture, too, faded. It was followed by an era of bullies and dictators whose ideology is expressed in their egotism. 'How a minority, becoming a majority, hates the minority.'"

Russia had got rid of folks she didn't want and clamped down a regimented form of government so severe that no man dare criticize except at the risk of persecution or execution.

In Italy there was the same kind of dictatorial government. The country had been faced with disintegration until the advent of Mussolini. An Italian had told him, "Major Imrie: 'We were saved from economic disintegration and demoralization. We now have no labor troubles and we will stick to what we have got until we get something better.'"

As regards Germany, political minorities did not exist. Hitler, mostly among young people. "It was something hard to understand on this continent. But Germans had said to him they had been 'ground to the very gravel by the Treaty of Versailles, and nobody had seemed to be able to speak for the German nation.' Hitler had come along and promised to 'restore their national self-respect.'"

"Give me four years," had been Hitler's motto, and Germans had told Major Imrie: "We did not know we were giving so much, but we gave him a blank cheque. We did not know we were giving up freedom of speech, right of assembly, freedom of the press. We sold our birthright for a mess of pottage. We have no labor troubles. We have fairly good wages and there is no disorder. We gave up some things we want to get back

some day. But we were saved from red rule."

Major Imrie said that Great Britain had gone through the trepression period without surrendering what Germany had. She had said: "We would sooner go on short rations for a while than gorge at the table of a dictator." Minorities in Britain had sacred rights against possible despotism of majorities.

The speaker said he had criticized Britain's dose system. "But I never realized we in the United States would soon be paying a dose on a scale that was tremendous." He said he had asked Premier Chamberlain whether they were justified in the middle western States in a feeling of pessimism on the future of Europe. He had asked him was democracy on the way out in Europe.

Mr. Chamberlain had replied: "I don't think you need be too pessimistic. There is a lot of inflammable material lying around. But I think with the exercise of diplomatic skill and patience, we will postpone a European collision."

The answer of the British to Mussolini had been to launch their huge armament scheme of \$2,500,000,000. The speaker said he thought the greatest protection of the peace of Europe today was the strength of Britain.

Personally, he was of the opinion the United States still stood for the reign of law, based on the consent of the governed, and sustained by the organized opinion of mankind. He thought perhaps there was a slight trend towards centralization of power in the federal government, and the obliteration of differences between executive and judicial functions.

Western Sheep

Eastern Farmer Can Tell You All About Them

Western Canada is where men are men and where even the sheep are well-behaved, according to Harold Arnold of Pickering, Ont. farms, and he should know.

Arnold bought 2,400 lambs from Saskatchewan ranches and they reached his farm early in the morning—"baa-a-ing" so quietly the neighborhood was not stirred. And there's a reason for their politeness. "Western sheep," Arnold said, "have a natural instinct not to make any noise. They fear the coyote and know that any noise will make their presence known to the killer."

There are 24 "black sheep" in the flock, but they aren't the proverbial kind. They are karakuls, used by westerners for counting. With every 100 sheep in a shipment a karakul is put in and they serve also to keep the wolves away. The wolves spot the black dots among the large flocks and think they are men.

Will Make Christmas Puddings

Princess Elizabeth Preparing To Bake Some For Her Friends
Princess Elizabeth is preparing to bake Christmas puddings herself as gifts for some of her little friends.

Queen Elizabeth gave her an old family recipe which she herself had used as a young girl. The Princess wrote to the Buckingham Palace chef, giving him a list of ingredients she wished to have at her disposal when she returned from Balmoral, Scotland.

When in London the 12-year-old Princess passes one day a week in the palace kitchens under the instructions of the chef.

Drifted Long Distance

Three bottles containing records of their launching in American waters have been picked up on the Scottish and Irish coasts, the Hydrographic Office of the navy reports. They had drifted, respectively, about 4,000, 3,500 and 3,300 miles. One had been put overboard north of the West Indies and the two others off the Carolina coast.

Taking Pleasure Jaunt

Former British Columbia Newspaper Man Sailing Yawl Around World

Favored by a spanking tailwind, Ernest J. Moy, formerly of British Columbia, sailed his 38-foot "luxury" yawl, the Dione, southward through the Gulf of Mexico waters on the first leg of an 80,000-mile story book pleasure jaunt around the world.

Aboard with Mr. Moy was his young wife, dressed in jersey and slacks and with a boy scout knife strapped to her waist, and two Tampa seamen, Charles Schetter, 34, and William Hughes, 22.

The craft's clearance papers read, "London, via Singapore and way points" and Mr. Moy said, "When we get there doesn't matter."

In fact the happy party, who has but one arm, said the jaunt may take five or even ten years. He said before sailing that his lifetime ambition had been to circle the globe in his own ship.

Mr. Moy, who said he at one time owned several British Columbia newspapers and is now retired, purchased his yawl in New Haven, Conn., last year and with his wife sailed it down the Atlantic coast and up the Gulf of Tampa. His home is in Seattle, Wash. He spent six months provisioning and preparing the craft for the long trip now under way, and included in equipment rifles, side arms and a supply of tear gas, to be used, he said, "just in case."

Also aboard were hundreds of small articles such as scissors, knives, safety pins, mirrors and colored ribbons to be used in trading with natives on the many islands en route.

Snake Venom

May Be Used As Treatment To Save Eyesight

The venom of snakes most deadly to man soon may prove one of the most effective treatments to save eyesight, a South American physician said.

The deadly fluid of rattlesnakes, water moccasins, cobras and other poisonous reptiles already has been successful in treatment of some eye disorders, Dr. M. E. Alvaro of Sao Paulo, Brazil, told the American Academy of Ophthalmology and Otolaryngology.

Such conditions as inflammation of the tiny arteries of the eye, blood clots in the eye veins, and spasms of the blood vessels have been treated with the venom, previously rendered less active with heat or chemicals.

The action of these toxic venoms is still not clear, Dr. Alvaro said. In some cases it acts as a dissolving solution in the blood to clear away blood clots, while in other cases it coagulates the blood and forms clots.

Something To Know

Col. James A. Moss, retired, president general of the United States Flag Association, retired, in answer to a Brooklyn trading inquiry made originally of Mayor LaGuardia, that it is all right not to stand during a rendition of the United States National Anthem if you are in bed, eating, telephoning, playing cards or taking a bath.

Forthcoming British Naval Program for 1939 Reported To Be On a Large Scale

International Plowing Match

Lord Tweedsmuir Shakes Hands With Young Competitor

Grizzled farmers on chugging tractors or behind straining teams of big horses gave Lord Tweedsmuir an "agricultural" welcome to the international plowing match, blue-ribbon event of the farm world that had attracted 600 competitors and 125,000 spectators to the rich farmland of the central Ontario Mining pass.

Denim-clad veterans of the age-old plow turned ear upon ear as the Governor-General tramped rain-dampened ground examining the neat furrows, poking a crown "with his cane or congratulating a smiling competitor."

Speaking from the platform of a sound-broadcasting truck, the Governor-General said that coming from England and the threats of war to Canada and peace, "this plowing match is a good omen that we shall be allowed to get on with our proper business."

He mentioned briefly the European crisis that reached its peak during his English visit. He was never more impressed, he said, by the coolness of the British, their fortitude and common sense.

Lord Tweedsmuir said it was the first time he ever had seen tractor plowing. He paused during his long walk to shake hands with pretty Emma Gordon, 15-year-old Harrison competitor.

"Pleased to have met you," said the teen plowwoman, in brown riding breeches and a red jacket. She was wreathed in smiles as she bent over in the seat of her big red tractor to shake the hand of the Governor-General.

Grain Standards

New Export Standard For Garnet Wheat Is Decided

Present definitions of commercial wheat grades were left intact by decision of the western committee on grain standards.

It was decided to set up new export standards for Nos. 1, 2 and 3 C.W. Garnet wheat as well as for Nos. 1, 2 and 3 C.W. Durum.

The committee recommended further study be made to obtain more information on the peculiar condition encountered in this year's crop in which appreciable quantities of wheat have been degraded for improperly ripened kernels. Bronzy colored kernels were found in wheat susceptible to stem or leaf rust, the committee reported.

Gaelic, the language of the Scottish highlanders, is spoken by the Maoris of New Zealand, according to Dr. C. L. Bennett, professor of English at Dalhousie University, Halifax, N.S., who has returned from Auckland.

British naval expansion plans for 1939 include at least one 35,000-ton battleship, several cruisers, two flotilla leaders, and numerous motor torpedo boats in addition to a big program of naval aviation development, it was reported in well-informed quarters in London.

It was believed not to be outside the range of possibility that authorization would be asked for three battleships instead of one.

As for naval aviation, informants said construction was planned on a vastly greater scale, coincident with the swing into mass production levels of planes being built for the Royal Air Force.

Provision for even one new battleship would bring to eight the total of 35,000-ton ships now being built or which have been authorized.

An admiralty spokesman said that 167 ships, totalling 680,000 tons, were being built or were authorized, as follows:

Building, 542,000 tons: Five battleships, six aircraft carriers, 19 cruisers, 25 destroyers, 19 submarines, five escort vessels, 13 motor torpedo boats, 17 miscellaneous. Total, 124.

Authorized but not contracted for, 118,000 tons: Two battleships, four cruisers, 30 boom defense ships, seven miscellaneous. Total, 43.

Artificial Wool

New Process For Manufacturing Product From Caseln

A new process for the manufacture of artificial wool from caseln has been invented by two members of the United States Department of Agriculture. The process is similar to that used in making viscose rayon from cellulose. It differs from the Italian method of making Lanital from caseln. The fibre resulting from the American process closely resembles the best quality of merino wool. The inventors believe that the fibre can be manufactured to be sold at a price on par with that of rayon that is about 50 cents per pound.

The process of manufacture is so similar to that of rayon that rayon plants can easily make synthetic wool by using caseln instead of cellulose and employing different chemicals. The United States already produces some 35 million pounds of caseln every year, which is used chiefly as a paper coating in the manufacture of plastic articles. There is an almost unlimited supply of skin milk available and it is possible to produce as much as 1,000 million pounds of caseln a year. Most of the skin milk is now used as cattle feed and it is not yet certain whether it is an almost unlimited supply of caseln. Experts say that production of milk for caseln alone would not be profitable. —International News Service.

A Satisfying Experience

Waking From Nightmare And Finding Everything Is All Right

One of the major satisfactions of life is waking up from a nightmare. The sun is shining in the window, or is about to do so. From downstairs there drifts the sweet scent of coffee, followed presently by that of flizzling bacon. It becomes more and more certain to us, as our senses return, that we did not fall off that precipice, were not caught by that lion, did not really find ourselves penniless and inadequately clothed in the main waiting room of the Grand Central station. The airplane has not caught fire, we are not in jail, and we are not going to die—not yet, anyhow. For tried to take the rest out of this experience with his story of the young man who dreamed that he had the plague, woke up in a grateful dither to the liveliness of a Florentine morning, and then found he really had it. But this does not commonly happen.—New York Times.

A vessel is said to be "under weigh" from the moment her anchor is "weighed" or lifted from the ground, even though she may not be "under way."

Use your head and, in proportion you will get ahead.

Scraps Make Jiffy Afghan Colorful

Get at this jiffy afghan now and have it ready for the football season. It's made of triangles—all in different scraps with the exception of the darkest ones that are the same throughout. The simple stitch—it's an easy but decorative one—gives the triangle body so that the finished afghan has a fluffy thickness. Pattern 6216 contains directions for making an afghan and pillow; an illustration of it and of stitches; materials required; and color scheme.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

NIGHT COUGHING CAN OFTEN BE PREVENTED

If your child often coughs at night because of even a slight cold—do this at bedtime: Thoroughly massage Vicks VapoRub on throat, chest, and back. VapoRub's poultice-vapor action tends to keep the air-passages clear, helping to maintain normal breathing through the nose, and so reducing mouth-breathing (the frequent cause of night coughs). Try it tonight—learn for yourself another reason why VapoRub is a family standby in more homes than all other medications of its kind put together.

VICKS VAPORUB

POOR MAN'S GOLD

Courtney Ryley Cooper

© Courtney Ryley Cooper.
WNU Service.

CHAPTER VI.—Continued

Hammond began to file the ragged edge of a long-handled shovel. "Don't you think it's up to us to get as much gold out of that creek placer as we can? We'll have to be hiring men soon."

The older man shot him a quick glance. "That's the fourth or fifth time you've brought that up," he said.

"Well?" asked Hammond. "Didn't we talk it over the other night?"

"We didn't come to any decision," "I did."

"We Didn't Come to Any Decision."

"That doesn't make two of us." A certain asperity had grown up between the two; looking back,

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pop that Sends You Bounding Up the Stairs. People who struggle to reach their second story have been completely cut off from their blood. Just as surely you are oxygen-starved if you carry the blood in your legs. Carry the oxygen you breathe in to every part of your system. With the oxygen-carrying capsules, your kidneys, liver, stomach and bowels glow down. Your skin gets pale, flabby, often pimply. Your nerves may become jittery—you are suddenly—feel depressed.

What you need is Dr. Williams' Pink Pills. These wonderful pills help make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Can Dr. Williams' Pink Pills help at your drugstore. Ask for yourself how quickly this time-tested blood-builder will get you back your pep. Cap. 1988, U.S. Patent Co. Ltd.

Hammond felt that McKenzie Joe's nature had become steadily sorer ever since the first arrival of Timmy Moon's airplane and its passengers. Jack had resented that, as though it were an implied insult to the girl he loved.

"Look here, Joe. We've got to get our money out of this discovery. We can't stay here forever."

"Seems to me," McKenzie Joe said, as he looked out over the valley, "when we found this place, we both figured it was where we were going to settle down—that we had a life job."

"We're not going to have a year's job, if we don't find that older bedrock. That Loon creek placer won't be enough for us."

"It's enough for me right now," the older man said. "I ain't ever seen that much money before."

Hammond bent over the shovel blade.

"Our ideas are different there." "You mean, you've let somebody change 'em for you."

Hammond threw down the shovel; it clattered on the wooden floor toward the upper diggings, a new test shaft, somewhat distant from camp and rather deep in the forest, by which they sought the bedrock.

"I'm getting tired of that. If you've got anything to say about Kay Joyce, come out and say it."

The other man glanced at him over his shoulder.

"Did I mention any names?" he asked quietly and moved away toward the upper diggings, a new test shaft, somewhat distant from camp and rather deep in the forest, by which they sought the bedrock.

Instead, with the shovel over his shoulder, he headed for the placer workings along the creek. It was a rejuvenated camp through which he moved. A roar sounded from the lake and Timmy Moon's airplane took off for Wrangell. From far away came the sound of hammer over at Around the World Annie's on the Alaskan side; a tiny town had begun there; she called it Whoopee. As Hammond walked on, he passed a squat Siwash gawk, gleaming in a new shawl of widely checkered design, an importation by air.

Then he became aware that someone was calling him. It was Jeanne Towers, waving excitedly from the doorway of her cabin store.

"I've almost sold out!" she exclaimed, as he approached. "I'm going to send in another order tomorrow. Larry Baine, he's the one with the all-metal junkers, is going to bring me back a whole lot of stuff from Fourcours."

"That's the way a business grows," Hammond barked. "Two hundred dollars for a claim, doubled all in a couple of weeks."

Jeanne laughed, tipping her homemade gold scales with a toy finger.

"Well, nearly doubled. I hope I do it again."

"And a dozen times after that. Then I'll know where to borrow if the gold-mining business plays out!"

He went on then, at last to reach Loon creek. Kay was not yet there; it was still breakfast time in most of the camp. But Bruce Kenning was moving along the stream, toward one of his claims a quarter mile beyond. A few hundred yards up the stream, where the raw-boned Olson scooped the earth by great shovelfuls into his sluice, was Mrs. Joyce. Hammond saw her there often; now and then he had found Olson sitting on the veranda of the Joyce cottage, talking of wanderings in many lands in his search for gold, while Mrs. Joyce gave far more than her usual monosyllabic rejoinders. There was something about the man which seemed to fascinate her. Suddenly he ceased his musings. Bruce Kenning had come beside him.

"How's the work going with McKenzie Joe?" he asked quietly. Hammond shrugged his shoulders. "I haven't been able to get anything. He still wants to put down one thing at a time and give the rest of his life to it."

Kenning frowned. "You can't have that. I'm convinced that the old river bed lies over toward the British Columbia hills," he chuckled. "I wish it were the other way around—all my claims are in the other direction."

Hammond grinned. "Well, you can't say I didn't tell you."

"Oh, you're talking about that stuff I bought from Jeanne Towers. I've added to that a great deal—on the chance that somebody around here would want it. But everybody's looking the other way. Just as well. I'm obligated to turn over some

ONLY THE BEST

IS GOOD ENOUGH

This outstanding triumph is proof of quality. Twelve first prizes in twelve classes at this year's Baby Show at the Toronto and Ottawa Exhibitions, were won by babies fed on 'Crown Brand' Corn Syrup.

What better evidence can there be of the confidence which Canadian mothers and their physicians have in the purity and quality of 'Crown Brand'.

A delicious table syrup. 'Crown Brand' is a treat for the whole family.

Tell the boys that pictures of famous hockey stars can still be obtained for 'Crown Brand' Corn Syrup labels.

CROWN BRAND CORN SYRUP

THE CANADA STARCH COMPANY LIMITED

worthless claims to an English syndicate.

"Something I took over out of what was left when Joyce died. I guess the house is crooked. They say frankly they probably won't develop the property. They just want something cheap in a live mining camp."

"A stock-selling scheme, probably." "I haven't much doubt about it. Be glad to have the thing over."

"So would I," Hammond felt he could share Kenning's repugnance. He was freed these days with the thought of new gold, clean money.

The eagerness had been mounting ever since that night when Kay had told him her decision. To get gold for his—his hands clawed for gold. His mind was centred upon little else.

"How deep do you think we'll have to go to reach that old bedrock?"

"A lot deeper than you'd imagine—ninety to a hundred and twenty feet. From my study of the strata, I can't see any other answer."

Hammond whistled. "That means a lot of work."

"You bet it means work and men. And a concentrated campaign. Any other method will keep you here for the next fifty years. You've got to spend money to make money in mining."

"That's what I've been trying to tell McKenzie Joe. But he—"

There he halted. Kay was coming down the trail. Bruce Kenning called good morning and went up the stream. Hours later, with Kay and Hammond watching intently, the workmen began a clean-up of the sluice box on the Joyce claim. It only revealed the usual floor gold, indications of something more to come, but as yet, nothing worth saving.

"Neither this flume nor the sluice is long enough," one of the workers complained. "Me 'n' Jim waste an awful lot of time 'just standin' around, for fear of shovelin' in too much gravel."

"Then build 'em up now, while you're dried out for the clean-up," Hammond said. "I'm going past the sawmill. I'll tell 'em to send some lumber."

"And nails," called Kay.

"I'll get them," Hammond lifted the stream, with its lines of eager workers. At the sawmill he gave the lumber order, then turned for Jeanne's to get the nails. She met him, some fifty yards away, returning from the delivery of a batch of darning.

"Haven't sold all those nails?" he asked.

"I think there are some left. There's been a run on them this morning. Everybody in camp wants nails—or glass."

They reached the store and she lifted the peg from the hap—few persons in Sapphire Lake even bothered to close their doors. Then,

pushing the door open, she walked within the store, suddenly to gasp and to hurry around the end of the rough counter.

The crudely built money drawer stood open. The girl wavered, staring at it, her hands half-raised, her jaw sagging. Then she said, in a queerly dulled voice:

"Somebody's been in the store!" "Had you left your money here?" Hammond asked sharply.

"Yes—all of it. I—thought—nobody ever bothers to look up—"

Hammond stared at him. It seemed inconceivable that crime should have entered this far-away place; Sergeant Terry's main work was growing a garden. Beside him, Jeanne Towers continued to stare blankly; it was as if they sought an explanation of the impossible; the supernatural.

"But who would want to steal my money?" she asked dazedly. "They took everything; the bills, and my nuggets and a bottle of gold dust—"

Hammond did not answer. The door had begun to swing shut; the faint breeze threatened to sweep to lift a bit of paper, hitherto unnoticed, and whisk it to the floor. Jack moved for it, but the girl, with swift intuition, sped before him. She grasped it, turning it in her hand. There, with spasmodic movement, she crumpled it in a tightly clenched fist.

"It's—nothing," she said. Her face was bloodless.

Mathieu's Syrup
Solely Made in Canada

The new car models will be out soon. There is a rumor that the coach has been put on the back seat driver.

Rheumatism

JUST DO WHAT YOU SEE IN THESE PICTURES TO RELIEVE PAIN QUICKLY

1. Take 2 "Aspirin" Tablets with a full glass of water the moment you feel either rheumatic or neuritic pain coming on.

2. You should feel relief very quickly. If pain is unusually severe, repeat according to directions.

To relieve pain of rheumatism or neuritis quickly, try the "Aspirin" way—shown above.

People everywhere say results are remarkable. "Aspirin" Tablets are economical, which makes the use of expensive "pain remedies" unnecessary.

If this way fails, see your doctor. He will find the cause and correct it. While there, ask him about taking "Aspirin" to relieve these pains. We believe he will tell you there is no more effective, more dependable way normal persons may use.

Demand and Get "ASPIRIN"

250 Historic Sites

Marking Stirring Events In The History Of Canada

More than 250 monuments and tablets have been erected throughout Canada during the past 16 years to mark points of historic interest which have been declared by the Historic Sites and Monuments Board of Canada as being of outstanding national importance.

An honorary advisory board, the Historic Sites and Monuments Board, composed of recognized historians, co-operates with the National Parks Bureau and the Department of Mines and Resources in the marking and preservation of historic sites, and from the Atlantic to the Pacific striding events in the history of Canada are recalled by tablets and monuments erected by the government.—Canadian Resources Bulletin.

Plenty When It Came

Oklahoma City Suffered A Flood After Water Shortage

It was tough when Disney Oklahoma, was without water. It was just as tough when water came. Short of supply since mid-July, residents left their faucets open constantly to catch every drop that entered the mains. City engineers found a good flow, hooked it on without notice. The new water supply boomed into the mains, the faucets, the homes. Disney suffered a flood.

Wales has banned the tacking of notices on trees.

MUSCULAR RHEUMATIC PAINS—ACHES

It takes more than "just a salve" to bring relief. It takes a "Muscular-irritant" like good old Muscurole—soothing, warming, penetrating and helpful in quickly overcoming the local congestion and pain when rubbed on the aching spots.

Muscular lambeage, soreness and stiffness generally yield promptly. Rubbed on the neck, Muscurole is used by millions for 30 years. Recommended by many famous doctors. Made in Canada, in three strengths: Regular, Children's (mild), and Extra Strong. All druggists, 40c each.

MUSCUIROLE
BETTER THAN A RUBBER PLASTER

In Memoriam.

NORDAL—In loving memory of our dear son and brother Elling, who passed away October 27, 1937.

'Tis sweet to remember a son and brother so dear.

Though absent from us, yet ever so near.

Unseen by the world, he stands by our side

And whispers "Grieve not; I am still near!"

Ever remembered by Mother and Dad and Sisters Ann, Clara, Olga and Mary.

On to the Highway!

The old proposal to have Stony Plain reach out to the gravelled highway has popped up again. Some of the residents who feel disappointed at the defeat of the scheme to have Jasper highway diverted so it would follow the old railway grade thru town, now believe that the next best thing would be to have our present Main street extended northward, to reach up to the Jasper roadway.

The advocates of the street extension have several schemes as to how this is to be done. One is, by a special levy on the property to be immediately benefited—this to include all of the proposed extension, from the C.N.Ry. tracks north to the main road. An authority on these matters claims that this is the procedure followed in other municipalities. When the matter was up for discussion some years ago it was dropped when it was found that the town might be called on to bear the expense of the extension.

Stony Plain and District.

KING-HORNE—In Stony Plain on Sunday, Oct. 23d, Miss Clara Horne, daughter of Mr and Mrs Ferdinand Horne of Stony Plain, became the bride of Mr Walter King of Luseland, Sask. The ceremony was performed by Rev L G Sieber, pastor of Stony Plain United church, Mr Art Horne acted as groomsmen.

LUTZ-HENNIG—On Sunday, Oct. 23d, Miss Lydia Hennig, (daughter of Mrs C Hennig, of Stony Plain district) became the bride of Mr Philip Lutz of Edmonton. Rev E Eberhart performed the ceremony.

Our fire fighting equipment was given a tryout on Thursday last, before a representative of the Fire Underwriters. The latter, it is said, recommended some improvements be made to the outfit, and these recommendations will be carried out.

Mr Chas. Witherspoon, an oldtimer of this district, passed away Oct. 20, aged 56 years. He is survived by his wife and one son Ralph of Lavo. The funeral service was held on Saturday in Edmonton, Rev O G Stone officiating. Interment was made in Beechmont cemetery.

The local Junior Grain Club will hold its Achievement Day, consisting of a Seed Fair and Public Meeting in Stony Plain Fire Hall on Sat. Nov. 5. All exhibits must be placed before 1 o'clock. Everyone welcome. Walter Goertz, Pres.; D Dale, Sec.

To Rent, the Christie house, Main St. opposite Royal Hotel. Inquire at Sun Book Shop.

CARD OF THANKS—Mr. J. P. Fuhr and Family wish to thank all their friends for the kindness shown and for their expressions of sympathy on their recent bereavement, and particularly to Dr Jespersen and Nurse Miss Paul.

Keep Friday, Oct. 28, open, as this is the date of the Dirt-Movers' Ball at Kelly's Hall.

For Sale—9 year old mare, with Colt. Apply O to Schatzke, Stony Plain.
